Plant and Soil **182:** 345–347, 1996.

Contents Volume 182 (1996)

Growth and morphology of eucalypt seedling-roots, in relation to soil strength arising from compaction
R.K. Misra, A.K. Gibbons **1–11**

Compared cycling in a soil-plant system of pea and barley residue nitrogen
E.S. Jensen **13–23**

Grain yield, symbiotic N_2 fixation and interspecific competition for inorganic N in pea-barley intercrops
E.S. Jensen **25–38**

The effect of soil compaction on growth and P uptake by *Trifolium subterraneum*: interactions with mycorrhizal colonisation
H. Nadian, S.E. Smith, A.M. Alston, R.S. Murray **39–49**

Effect of glutamate transport and catabolism on symbiotic effectiveness in *Rhizobium leguminosarum* bv. *phaseoli*
M. Labidi, R. Lalande, S. Laberge, H. Antoun **51–58**

The influence of native rhizobacteria on european alder (*Alnus glutinosa* (L.) Gaertn.) growth. I. Characterization of growth promoting and growth inhibiting bacterial strains
A. Probanza, J.A. Lucas, N. Acero, F.J. Gutierrez Mañero **59–66**

The influence of native rhizobacteria on european alder (*Alnus glutinosa* (L.) Gaertn.) growth. II. Characterisation and biological assays of metabolites from growth promoting and growth inhibiting bacteria
F.J. Gutierrez Mañero, N. Acero, J.A. Lucas, A. Probanza **67–74**

Effect of primary leaves on ^{59}Fe uptake by roots and ^{59}Fe distribution in the shoot of iron sufficient and iron deficient bean (*Phaseolus vulgaris* L.) plants
C. Zhang, V. Römheld, H. Marschner **75–81**

Long-term effects of CO_2 enrichment and temperature increase on a temperate grass sward. I. Productivity and water use
E. Casella, J.F. Soussana, P. Loiseau **83–99**

Long-term effects of CO_2 enrichment and temperature increase on a temperate grass sward. II. Plant nitrogen budgets and root fraction
J.F. Soussana, E. Casella, P. Loiseau **101–114**

Cadmium uptake and bioaccumulation in selected cultivars of durum wheat and flax as affected by soil type
G. Cieśliński, K.C.J. van Rees, P.M. Huang, L.M. Kozak, H.P.W. Rostad, D.R. Knott **115–124**

Application of ^{15}N and xylem ureide methods for assessing N_2 fixation of three shrub legumes periodically pruned for forage
M.B. Peoples, B. Palmer, D.M. Lilley, L.M. Duc, D.F. Herridge **125–137**

The effect of nitrogen fertilization on the phenology of roots in a barrier island sand dune community
E.P. Weber, F.P. Day 139–148

Denitrification in lucerne nodules is not involved in nitrite detoxification
J.I. García-Plazaola, C. Arrese-Igor, A. González, P.M. Aparicio-Tejo, J.M. Becerril 149–155

Localised impact of Sitka spruce (*Picea sitchensis* (Bong.) Carr.) on soil permeability
N. Chappell, A. Stobbs, L. Ternan, A. Williams 157–169

Root foraging strategies and soil patchiness in a humid savanna
P. Mordelet, S. Barot, L. Abbadie 171–176

Total, organic and extractable-P in humus and soil beneath Sitka spruce planted in pure stands and in mixture with Scots pine
B.L. Williams 177–183

Elevated CO_2 effects on carbon and nitrogen cycling in grass/clover turves of a Psammaquent Soil
D.J. Ross, S. Saggar, K.R. Tate, C.W. Feltham and P.C.D. Newton 185–198

Evaluation of three herbaceous index plant species for bioavailability of soil cadmium, chromium, nickel and vanadium
H.W. Martin, T.R. Young, D.I. Kaplan, L. Simon and D.C. Adriano 199–207

Calcium sulfate or coal combustion by-product spread on the soil surface to reduce evaporation, mitigate subsoil acidity and improve plant growth
K.D. Ritchey, R.F. Korcak, C.M. Feldhake, V.C. Baligar and R.B. Clark 209–219

Aluminium-organic acid interactions in acid soils. I. Effect of root-derived organic acids on the kinetics of Al dissolution
D.L. Jones and L.V. Kochian 221–228

Aluminium-organic acid interactions in acid soils. II. Influence of solid phase sorption on organic acid-Al complexation and Al rhizotoxicity
D.L. Jones, A.M. Prabowo and L.V. Kochian 229–237

Kinetics of malate transport and decomposition in acid soils and isolated bacterial populations: The effect of microorganisms on root exudation of malate under Al stress
D.L. Jones, A.M. Prabowo and L.V. Kochian 239–247

^{15}N natural abundance in forest and pasture soils of the Brazilian Amazon Basin
M.C. Piccolo, C. Neill, J.M. Melillo, C.C. Cerri and P.A. Steudler 249–258

Seed source variation in ^{32}P uptake in *Pinus taeda* L. seedlings: A possible regulation by efflux
M.A. Topa 259–265

Soil organic matter and the indigenous nitrogen rice systems in the tropics
K.G. Cassmann, A. Dobermann, P.C. Sta Cruz, G.C. Gines, M.I. Samson, J.P. Descalsota, J.M. Alcantara, M.A. Dizon and D.C. Olk 267–278

Deep soil heterogeneity and fine root distribution in forests and pastures of eastern Amazonia
K. de Oliveira Carvalheiro and D.C. Nepstad 279–285

Copper toxicity in young maize (*Zea mays* L.) plants: effects on growth, mineral and chlorophyll contents, and enzyme activities
B. Mocquot, J. Vangronsveld, H. Clijsters and M. Mench **287–300**

A comparison of soil core sampling and minirhizotrons to quantify root development of field-grown potatoes
F.J. De Ruijter, B.W. Veen and M. Van Oijen **301–312**

Intra-specific variation in relative growth rate: impact on competitive ability and performance of *Lychnis flos-cuculi* in habitats differing in soil fertility
A. Biere **313–327**

Study of differences between vertical root maps observed in a maize crop and simulated maps obtained using a model for the three-dimensional architecture of the root system
L. Pagès and S. Pellerin **329–337**

The effects of soil warming on plant recruitment
L.J. Thompson and S. Naeem **339–343**

Volume contents **345–347**

Author index **348**

Instructions to authors **349–351**
